

Survey No. 220

For: K. C. Wernmark & L. C. Johnson

Purpose of Survey: To establish the boundaries of Lots 5, 6 and 7, Block No. 1, and Lots 6, 7, 8 and 9, Block No. 2, also a small triangular tract being the southerly portion of Lot No. 9 now described with Lot No. 8 of Block No. 2, all in Griffiths' Addition to Central Point.

Using the existing street monuments along Pine Street, 7th Street and 8th Street as controls for street locations, and monuments as previously set on survey No. 189 (Recorded Jackson County Engineer's office) and the official plat record distance along Pine Street as controls for the outside boundary of Griffiths' Addition.

All measurements were found to be equal to or within a few hundredths of a foot from those reported on the said official plat of Griffiths' Addition. These differences were proportionately allotted and the lots staked accordingly as shown on the map to accompany this report.
