IRON FOUND

Survey Narrative to Comply with Section 87-330 Oregon
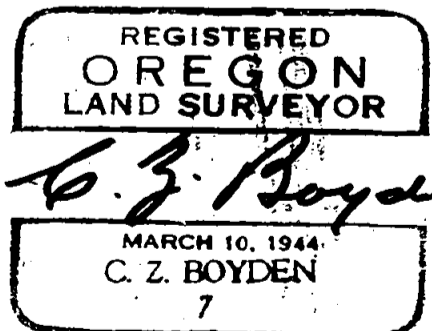

State Law (1947)

For: Elk Lumber Company, California Oregon Power Company

and Eugene Burrill.

Purpose: To establish the west and south lines of Section

6, Township 33 south Range 3 east.

Began at the re-established Township corner to

Townships 32 and 33 South, Ranges 2 and 3 East, and ran on

random line south to the witness corner to the ¼ corner to

Sections 1 and 6, where an original witness tree was found.

Then triangulated across the Rogue River Canyon and con-

tinued south to the ¼ corner to Sections 7 and 12, the

first Government corner which could be established from

evidence of original witness trees. Then computed the

location of the Section corner, ¼ corner and 1/16 corners

along this line by a single proportion between record and

measured distances. Then ran on random line east on the

south boundary of Section 6 to the ¼ corner and continued

to the southeast section corner of Section 6, which corners

were established from evidence of the original witness trees.

Then computed the location of the 1/16 corners by a single

proportion between record and measured distances. Iron

pipe monuments were set at all corners established or

re-established.
