OREGON STATE PARKS & RECREATION DIVISION SURVEY
 JOSEPH STEWART STATE PARK
 Sections 20, 29 and 30, T33S, R2E, W.M.
 Jackson County, Oregon
 December 21, 1984

NARRATIVE
 (See Accompanying Plat)

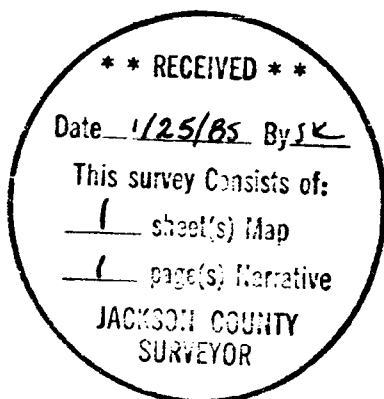

The purpose of this survey was to establish the boundary of Joseph Stewart State Park located in the southeast quarter of Section 20, the northwest quarter of Section 29, and the northeast quarter of Section 30 in Township 33 South, Range 2 East, Willamette Meridian.

The bearings are Oregon Grid South Zone. The bearing basis was from a survey by Hoffbuhr/Bath & Associates dated April 30, 1983, utilizing the control monuments "P.O.S.T. 10-B" and "P.O.S.T. 11-A." A theta angle of $1^{\circ}26'30''$ was calculated from the grid coordinates of "P.O.S.T. 10-B" for conversion to true bearings.

Control traverses were established using a Kern "K-1SE," one-minute theodolite and a Hewlett-Packard "HP3805" electronic distance measuring instrument.

The north quarter corner of Section 20 is located under water, a calculated position was proportioned to match the location with that of the Hoffbuhr/Bath survey. All other necessary corners to complete this survey were found and tied to control traverses.

Several random points were set along the park boundary in Section 30 and are not meant to be corners of aliquot parts of the section. Also the boundary lines of the park have been marked at frequent intervals with park boundary tags nailed to trees.
