Survey No. 11043

SURVEY NARRATIVE TO COMPLY WITH O.R.S. 209.250.

Survey for: Boise Cascade Corporation
P.O. Box 100
Medford, Oregon 97501

Location: Located in the southwest, northwest and northeast quarters of Section 8, Township 34 South, Range 1 East of the Willamette Meridian, Jackson County, Oregon.

Purpose: To monument and mark the property lines as shown on the attached map.

Procedure: The controlling corners were tied via a closed traverse with a Wild T-2 theodolite and H.P. 3805 E.D.M. The west quarter corner has been searched for numerous times in the past. Using the proportion position I made a diligent search of the area with no success. I have found with other work in the township that Ives and Hyde did a good job in this area. Distance has been within 20 feet or less with consistency as well as relatively close bearing. The calls I tied also fit with the same consistency. I therefore set the quarter corner between section 7 and 8 at the proportion position.

The following bearing trees or objects were established by me for corners monumented on this survey:

1/4 7 & 8	W. Oak 12" dia., brs. S54°24'E 20.8 ft.
	W. Oak 6" dia., brs. S40°02'W 41.3 ft.
N 1/16, 7&8	D. fir 5" dia., brs. S47°E 22.7 ft.
	Madrone 8" dia., brs. N49°W 7.6 ft.
	Var. 17° E.
NW 1/16	W. Oak 6" dia., brs. N27°53'E 32.7 ft.
	D. Fir 15" dia., brs. S59°26'W 28.6 ft.
CW 1/16	Chisel "X" in bedrock, brs. N56°07'21"E 7.19 ft.
	W. Oak 5" dia., brs. N82°20'W 56.2 ft.

The bearing trees were tied at the center of the tree at the lower blaze.

A solar observation is the basis of bearing.
