Narrative - John Mace and M.C. Lininger and Sons

A correction description was prepared for the Silliman property to fix the boundaries as occupied.

Bearings were established from the Rogue Base Line Meridian corrected for convergency.

SURVEY NARRATIVE TO COMPLY WITH PARAGRAPH 209.250,
OREGON REVISED STATUTES

FOR: JOHN MACE AND M.C. LININGER AND SONS.

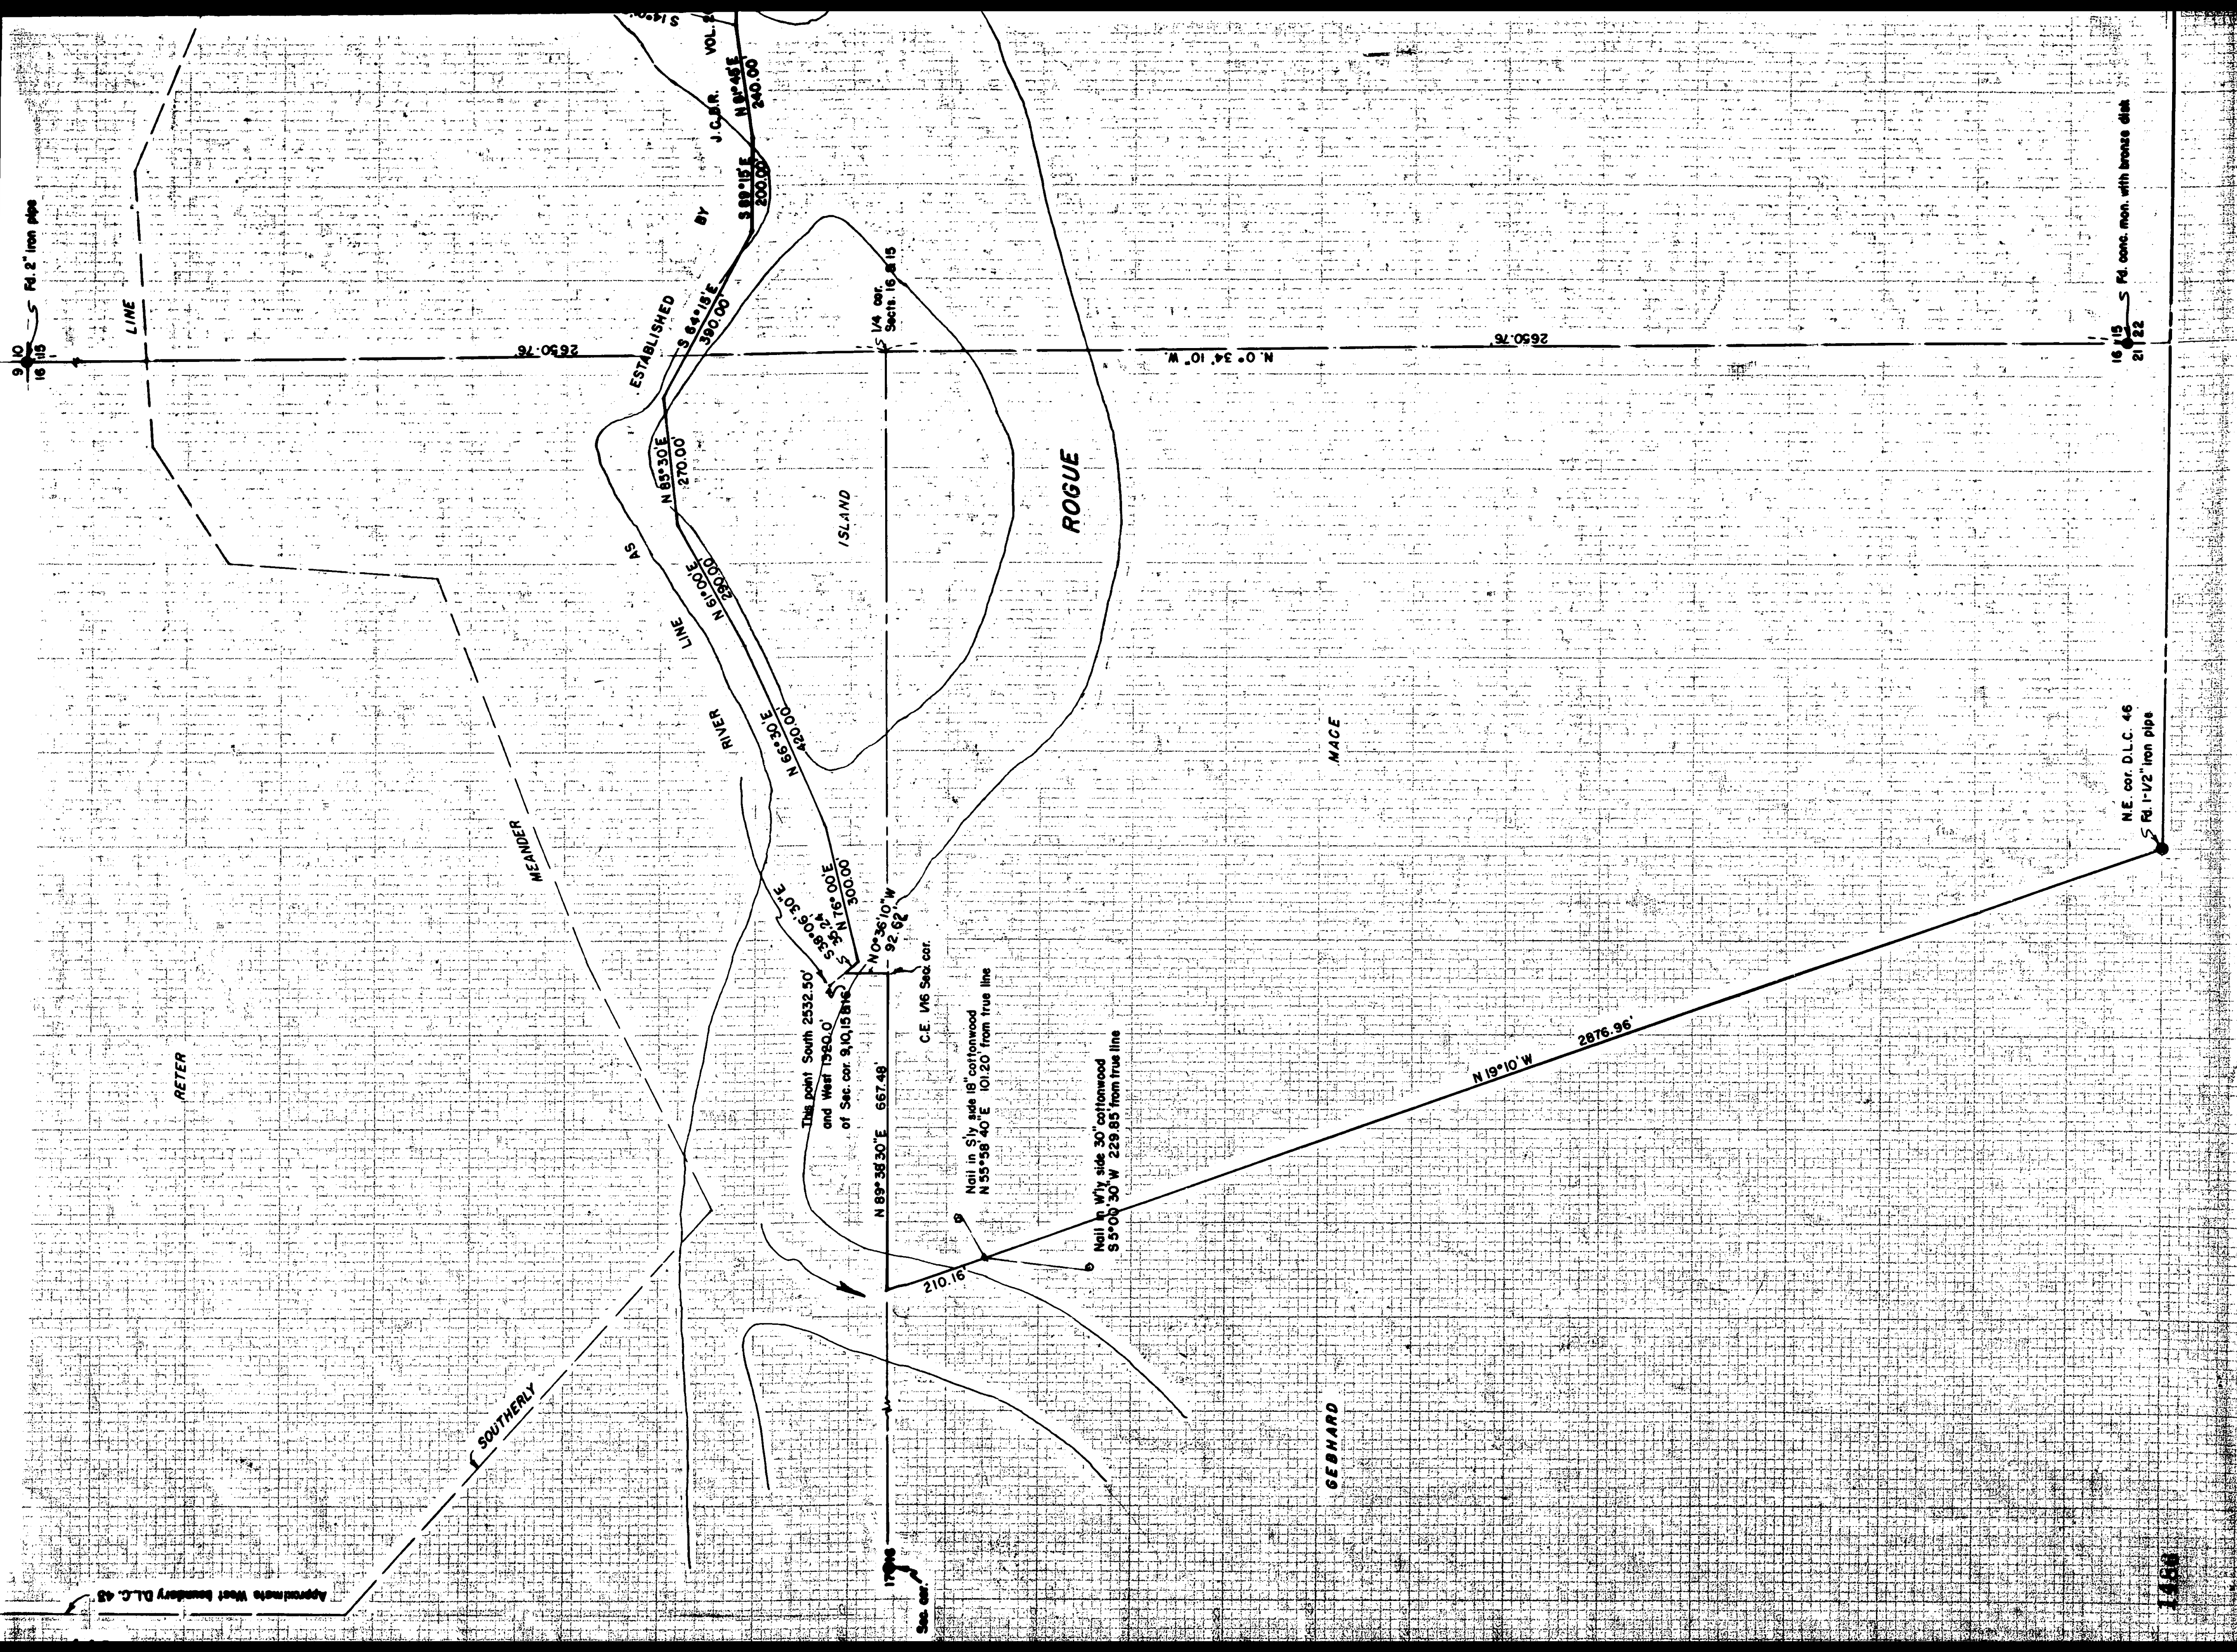

PURPOSE: To locate the Northerly boundary of the Mace Property in Sections 15 and 16, Township 36 South, Range 2 West.

PROCEDURE: Previous surveys made by C.Z. Boyden prior to 1945 had tied together the Southwest and Northwest corners of Section 15, the West 1/4 corner of Section 16, the Northeast corner of Donation Land Claim No. 46 and the Southeast corner of Donation Land Claim No. 45.

Began this survey at the officially re-established Northeast corner of Donation Land Claim No. 46 and traversed Northerly to the Northwest corner of Section 15. Thence ran a closed loop enclosing the river in Section 15 and a stub traverse line to the vicinity of the Northwest corner of the Mace Property.

From this basic field information, calculated the position for the Northwest corner of the Mace property, the Center-east 1/16 Section corner and the river line as established by agreement as recorded in Volume 261, Pages 159-162. This line was then marked on the ground with temporary points, and base line monuments were set out on firm ground to enable a re-establishment of this line in future years.

The interested parties then agreed upon an established boundary between the Easterly portion of the Reter property, the Robinson, Taylor and Nealon properties on the North and the Mace property on the South. A description of said line was prepared so that by duly recording said agreement line, this line would permanently fix the boundaries of the properties regardless of the future river changes.
