SURVEY NARRATIVE TO COMPLY WITH O.R.S. 209.250

PURPOSE: To survey and monument the South line of the subject property.
PROCEDURE: Made ties to re-established Section and quarter-Section and DLC corners by GPS measurements combined with traverse ties. Computed the NW corner of DLC #66 by proportionate method from GLO plat measurements. The East, West and South lines of Lots 8-11 of SUNNYCREST ORCHARDS were defined by the N-S centerline of Section 9, the N-S centerline of the NW 1/4 of Section 9 and the North line of DLC #66, respectively. The Lot corners along North line of DLC #66 were computed by proportion. The West line of Lot 11 was held parallel to the N-S centerline of Section 9 since the Plat distances were the same on the North and South lines. The remaining N-S Lot lines were computed by splitting the bearing difference between the West line of Lot 11 and West line of Lot 8 into three and applying the correction to each N-S Lot line. Those monuments found as well as those set are as shown hereon.
