

SURVEY NARRATIVE

PURPOSE: To survey and mark the corners of a parcel of land leased by my client.

PROCEDURE: I received a legal description of the parcel to be surveyed by my client and a Subdivision/Partition report requested by me from the Title Company before I proceeded with my survey. This parcel was surveyed in 1964, as shown on filed survey number 2826. In 1967, the State of Oregon for additional right of way purposes acquired a portion of the Northwest corner of this parcel, as described in instrument number 67-01726.

I tied the Northwest corner of Donation Land Claim 61, Township 37 South, Range 2 West along with the Southeast corner of Donation Land Claim 39, Township 37 South, Range 1 West. From computed ties I calculated the positions of monuments set on filed survey number 2826. At the computed positions the monuments were searched for, but not found. I then tied right of way monuments and reference monuments set by the State of Oregon to compute the Easterly right of way line of Biddle Road and that portion conveyed in Instrument number 67-01726. Monuments were set at the lease corners as noted on the map.
