### SURVEY NARRATIVE:

**PURPOSE:** to establish a new boundary line running Southwesterly from Sykes Creek Road in the North 1/2 of Section 2 T. 35 S. R 04 W. W.M.

**PROCEDURE:** I accepted record N64°44'40"W, 6.69' from the iron rod set in Survey 4616 as shown on Survey 4616-A for the location of the East 1/16th corner on the North line of Section 2. From the Northeast corner of Section 2, I measured N 89°43'20" W, 737.60' along the North line of Section 2, computed from the monument set in Survey 4616, to intersect the center of Sykes Creek Road. I then measured S 39°53'06" E, 725.00 to again intersect the center of Sykes Creek Road. I then turned S 53°00'00" W and measured 30.05' to intersect the Southwesterly edge of Sykes Creek Road based on the center of the road as traveled and a 60' R-O-W, and set a 5/8" iron rod. I then measured S 53°00'00" W for 1260.0' and set an iron rod. This survey was performed with a Nikon DTM 430 Survey Station.
