Written narrative to accompany plat for Survey NO.

Survey for Mr. W. Benton Smith, 12 North Keenway, Medford, Oregon.

Located in NW 1/4 Sec. 26, & NE 1/4 Sec 27, T.37S.R.1 W. (W.M.)  
Jackson County, Oregon.

Date August 24, 1964 Bearings from survey NO. 948

Procedure:

Found stone with cross for the NE corner of D.L.C. NO. 58 on  
the south line of Cherry Lane, and found 1" bar for the road center  
at the P.I. point on the east end of the tangent for Cherry Lane.

We then chain checked the entire tangent to determine accuracy of the  
original pipes found. We found that the original corners for the tract  
were not accurately set on the right of way line, we found the 3/4"  
pipes for the original southwest corner, the original southeast corner,  
the original northeast corner and the original northwest corner, also  
we found all curve point references along the new road along the  
north line of tract.

From the above we made a complete boundary layout using original  
and existing monuments, and set 5/8" bars at 2" exposure for corners  
as shown on the attached plat.
