ROBT. M. THOMPSON & ASSOC.

Survey to Define Property for Lester L. Savage in
the NE1/4SW1/4 of Section 30, T36S R4W, W.M., Oregon

Narrative description to comply with Par. 209.250, O.R.S.

for: Lester L. Savage, 3560 Azalea Drive, Grants Pass, Oregon 97526

Purpose: To monument as requested, map, and describe an approximately
7 acre parcel of property.

Procedure: For that part of the former Lincoln Savage estate lying in the
E1/2SW1/4 of Section 30, surveys to define property for the heirs had previously
been made as follows:

1. Survey No. 3291, defining a 6.26[±] acre parcel for Margaret J. Dunham and a
6.10[±] acre parcel for Aetha A. Goings (the latter now deceased), and the
6.10[±] acre parcel conveyed to Bornholdt, O.R. 75-02606.

2. Survey No. 5871, defining an additional parcel for Dunham.

Of these 3 parcels, only the Goings (now Bornholdt) parcel appears as a
segregated ownership in the County records. It was agreed between Lester
Savage and the Dunhams that the south end of the Lester Savage parcel would
be "squared off" even with the south end of that tract defined by Survey
No. 5871. My survey began by re-running the West line of the Bornholdt
property to establish a basis for bearing (North) between the existing
corner monuments. A 5/8 inch iron rod was then set on said line for the
Lester Savage westernmost southeast corner, East of most southeasterly
monument set by Survey No. 5871. The bearing and distance of the most
Easterly boundary of Survey No. 5871 was then checked. The previously
set witness monuments, for the most Easterly northeast and southeast
corners of the Lester Savage parcel, were visited and verified to be still
in place as set. The information gained from the above work, and the
computations from my previous Survey No. 3291, were then used to draw up
a legal description for the Lester Savage parcel.
