

**HISTORY OF SURVEYS:**  
 The Northwest Corner of Section 6 was set by Sewall Truax, Deputy Surveyor under Contract No. 74, dated June 11, 1857. The West line of Township 40 South, Range 1 West was surveyed by A. O. Eckelson under Contract No. 328, dated June 17, 1879. The North Township line was Resurveyed and the Subdivisional lines were surveyed by Rufus Moore under Contract No. 475, dated July 3, 1883. The corners of Section 6 have been remonumented by the General Land Office, Bureau of Land Management, and the Jackson County Surveyor and are more particularly described in the attached survey narrative.

**GENERAL NOTES:**  
 This survey was executed using a Wild T-16ED Theodolite, a Wild T-2 Theodolite and a MAC II Electronic Distance Measuring Instrument. All bearings are referred to the true meridian based upon separate solar observations taken at the NW and SE Section Corners. The West line and the West half of the South line were blazed and posted by using right angle offsets from a traverse line. All other National Forest Boundary Lines were surveyed as true line in the field after a triangulation survey was made to determine the position of each government corner. All trees within three feet of true line were blazed. Trees on Forest Service land were quarter blazed with a hack mark above and below each blaze. Trees on private land received a single facing blaze and a hack mark above and below this blaze. All blaze and hack marks were painted red. National Forest Boundary signs were placed on posts within one foot of true line and spaced intervisibly along the property boundaries. See the attached survey narrative for additional information.

**CERTIFICATION:**  
 I, Richard L. Templin, Jr., Registered Professional Land Surveyor No. 1354 of the State of Oregon, hereby certify that this plat and the attached narrative are a correct representation of a survey which I executed from October, 1979 to February, 1980 for the U. S. Forest Service in accordance with Oregon State Statutes and with the provisions of Forest Service Cadastral Survey Contract No. 53-04HI-9-7634N

mark above and below each blaze. Trees on private land received a single blaze with a hack mark above and below this blaze. All blazes and hack marks were painted red.

*Richard L. Templin, Jr.*

Survey Narr. Con't. (6-40-1)

inches long, extending 5 inches above the ground, monumented with a brass cap, stamped:

From which, scribe new bearing trees:

A Douglas-fir, 14 ins. diam., bears S 6°02'W, 33.34 feet, scribed "NE1/16 S6 PLS1354 BT" with a brass washer stamped "PLS1354" nailed to lower blaze.

A Douglas-fir, 13 ins. diam., bears N 63°40'W, 12.86 feet, scribed "NE1/16 S6 PLS1354 BT" with a brass washer stamped "PLS 1354" nailed to lower blaze.

Thence, South 89°52'46" West, 1311.17 feet on true line to the Center North 1/16 Corner, at which point I set a 2 inch diameter iron pipe, 32 inches long, extending 5 ins. above the ground, monumented with a brass cap, stamped:

From which, scribe new bearing trees:

A Black Oak, 14 ins. diam., bears N 85°09'E, 37.17 feet, scribed "CN1/16 S6 PLS 1354 BT" with a brass washer stamped "PLS1354" nailed to lower blaze.

A Douglas-fir, 12 ins. diam., bears S 00°23' W, 44.10 feet, scribed "CN1/16 S6 PLS1354 BT" with a brass washer stamped "PLS 1354" nailed to lower blaze.

Thence, North 00°10'18" East, 1298.76 feet on true line to the North Quarter Corner of Section 6, hereinbefore described.

The triangulation portion of this survey was executed with a Wild T-2 Theodolite and a MAC II Electronic Distance Measuring instrument. The traverses and true lines were surveyed with a Wild T-16ED Theodolite and MAC II EDM. The bearings are referred to the true meridian based upon two independent solar observations taken at the NW and SE Section Corners.

The boundaries of National Forest land were marked with fiberglass posts, to which aluminum "Forest Boundary" signs were rivetted. These sign posts are set within one foot of true line and are intervisible but not more than 300 feet apart. Trees within three feet of true line were blazed. Trees on Forest Service land were quarter blazed with a hack

SEC.  $\frac{6}{7}$  |  $\frac{5}{8}$  COR.  
          |  
          C.S.  
          1970

From which:

Original Bearing Trees, scribed by Rufus S. Moore, per Contract No. 475, in 1883:

Survey Narr. Con't. (6-40-1)

scribing visible on opened blaze.

The only remaining bearing tree scribed by Marshall S. Wright, per Group 31 Resurvey, in 1917:

A Ponderosa Pine stump, 4 feet high, 23 ins. diam., bears N 43° 26'W, 39.06 feet, scribing visible.

Scribe new bearing trees:

A Douglas-fir, 7 ins.diam., bears N 41°56'E, 63.94 feet, scribed "T39S R1W S31 PLS1354 BT" with brass washer stamped "PLS 1354" nailed to face of lower blaze.

A Douglas-fir, 6 ins. diam., bears S 78°19'E, 32.93 feet, scribed "T40S R1W S6 PLS1354 BT" with brass washer stamped "PLS 1354" nailed to face of lower blaze.

A Douglas-fir, 8 ins. diam., bears N 64°58'W, 25.50 feet, scribed "T39S R2W S36 PLS1354 BT" with brass washer stamped "PLS 1354" nailed to face of lower blaze.

Thence, South 00°28'11" East, 2591.98 feet at which point I set the Quarter Corner common to Section 1, T. 40 S., R. 2 W., and Section 6, T.40 S., R.1 W. at proportionate distance. A diligent search was made for evidence of the original quarter corner, but none was found.

This area was burned over by a forest fire in the past. At the computed position for said Quarter Corner, I set a 2 inch diameter iron pipe, 32 inches long, extending 6 inches above the ground, monumented with a brass cap stamped:

From which, scribe new bearing trees:

A Douglas-fir, 9 ins. diam., bears N 39°00'E, 17.64 feet, scribed "1/4S6 T40S R1W PLS1354 BT" with brass washer stamped "PLS 1354" nailed to face of lower blaze.

A Black Oak, 7 ins. diam., bears N 81°30'W, 25.00 feet, scribed "1/4S1 T40S R2W PLS1354 BT" with brass washer stamped "PLS 1354" nailed to face of lower blaze.

Thence, continue South 00°28'11" East, 2591.98 feet to the Section Corner common to Sections 6 and 7, T. 40 S., R. 1 W., and Sections 1 and 12, T. 40 S., R. 2 W., which is monumented with a 2 1/2 inch diameter iron pipe, extending 6 inches above the ground with a standard BLM brass cap, stamped:

LOCATION: Section 6, Township 40 South, Range 1 West, Willamette Meridian, Jackson County, Oregon.

SURVEYED FOR: Rogue River National Forest, Medford, Oregon.

PURPOSE: To survey and mark the Rogue River National Forest boundaries in said Section 6, per U.S. Forest Service Cadastral Survey Specifications.

HISTORY: The Northwest Corner of Section 6 was set by Sewall Truax, Deputy Surveyor under Contract No. 74, dated June 11, 1857. The West line of Township 40 South, Range 1 West was surveyed by A.O. Eckelson under Contract No. 328, dated June 17, 1879. The North Township line was Resurveyed and the Subdivisional lines were surveyed by Rufus Moore under Contract No. 475 dated July 3, 1853. The original government corners have since been remonumented by either the General Land Office, Bureau of Land Management, or the Jackson County Surveyor; as noted later in this narrative.

PROCEDURE: The West line and the West half of the South line were blazed and posted by using right angle offsets from a traverse line. All other lines were surveyed as true line in the field after a triangulation survey was made to determine the position of each government corner. The government corners and the calculated bearings and distances are described as follows:

Commencing at the Northwest corner of Section 6, T. 40 S., R. 1 W., which is monumented with a three inch diameter iron pipe, extending 10 inches, above the ground, as set by the General Land Office, in 1917. This pipe is capped with a brass cap stamped:
